

Position: Geotechnical Engineer

KZA Engineering has an immediate opportunity for a Geotechnical Engineer in our Manasquan, NJ office. The successful candidate will play a key role in expanding our geotechnical services division.

Responsibilities:

- Implementing and managing geotechnical studies from inception to completion, including subsurface investigations, laboratory testing programs, engineering design, and report preparation.
- Construction-phase field engineering and supervision of construction materials testing.
- Client maintenance, training of junior staff, and assist with budget generation and proposal preparation.
- Some local and regional travel required.

Skills and Requirements:

- BS in Civil Engineering and a minimum 4 years relevant work experience.
- Licensed P.E. or ability to obtain registration within 12 months of hire.
- Candidate must be ambitious, motivated, and able to work independently, have a strong work ethic, and have excellent communication skills.
- Proficient with Microsoft Office software, including Word and Excel, as well as industry software such as gINT, Lpile, and proprietary retaining wall design software.

About the Company:
